Letter of endorsement

Re: Letter of endorsement to a consortium for the funding request entitled “HORIZON-JU-GH-EDCTP3-2025-03-NETWORKS-01: stage two

Dear Sir,

On behalf of QURE.AI TECHNOLOGIES LIMITED, C/O RODI & Partner Legal Limited, 170 Edmund Street, Birmingham, United Kingdom B3 2HB, VAT number - 404 2525 37 and in accordance with Council Regulation (EU) No 2085/2021 of 19th November 2021 establishing the joint undertakings under Horizon Europe and specifically Article 9 therein, I hereby submit an application to become a contributing partner to the Global Health EDCTP3 Joint Undertaking (Global Health EDCTP3 JU).

Qure.ai is a global leader in applying artificial intelligence for medical imaging, with a strong commitment to advancing TB diagnosis and management. Our objectives align closely with the Global Health EDCTP3 JU, particularly in strengthening health systems and addressing infectious diseases through innovation and digital health technologies.

We propose an in-kind contribution (IKOP) to the Global Health EDCTP3 JU in the form of AI-powered solutions to support TB research and care. This includes free provision of ten cloud licenses of our chest X-ray interpretation tool (qXR) and patient management platform (qTrack) for 5 years (valued at EUR 350,000), and piloting of our AI chatbot to support community health workers (valued at EUR 150,000). These tools have been used in over 3,800 sites globally, impacting more than 29 million lives and helping reduce time to diagnosis by 99%. Our contribution is intended to support work on TB multimorbidity in West Africa under the WANETAM-4 consortium.

This contribution relates to the EDCTP3-JU CSA call for proposals on strengthening regional networks for TB research in sub-Saharan Africa.

We will support Work Package 1 of the WANETAM-4 TB Work Programme, providing technology for image interpretation, patient tracking, and piloting of AI-based co-pilot tools. We will also contribute batch analysis for progression monitoring using sequential chest X-rays.

We estimate the total value of this contribution to be EUR 500,000. (EUR 350,000 for in-kind contribution of cloud licenses and EUR 150,000 for in-kind contribution of chatbot piloting and customization).

We confirm the following:

1. We will comply with the Horizon Europe Regulation (EU) No 2021/695; Council Regulation (EU) No 2085/2021 establishing the joint undertakings under Horizon Europe; the Model Grant Agreement for Horizon Europe and applicable Global Health EDCTP3 JU rules, including the relevant work programmes and in particular the call conditions therein.
2. We will keep all information received in the context of our involvement as contributing partner to the Global Health EDCTP3 JU confidential. This confidentiality obligation applies in particular but is not limited to the areas of Global Health EDCTP3 JU call topic preparation and publication, proposal submission and evaluation, and consortium formation. We further understand that this obligation strictly prohibits the release of confidential information to any legal entities save where specifically authorised by Global Health EDCTP3 JU. Internal dissemination of information within our organisation will be done on the basis of the "need-to-know" principle.
3. We are confident of our ability to fulfil the above commitments and further confirm our understanding that the Global Health EDCTP3 JU will allocate resources to the above topic based on these commitments.
4. The value of our contribution will be based on costs calculated in accordance with Article 6 of the Horizon Europe Model Grant Agreement.
5. We accept that additional modalities regarding the provision of our contribution may be defined in subsequent agreements or documents, such as a funding agreement and topic text.

Yours faithfully,

Divya Gupta
